DETAILED ACTION

1. Claims 5-11 are pending.

Response to Arguments

2. Applicant's arguments filed 29 September 2005 have been fully considered and they are persuasive.

Allowable Subject Matter

3. Claims **5-11** are allowed.
4. The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method for encrypting communication data on a communication network in order to secure the contents of data exchanged between a sender and a receiver. Each independent claim identifies the uniquely distinct features **"identifying a first configuration and a second configuration, each configuration respectively comprising positions of a plurality of the ridge endings and bifurcations in a planar system of coordinates superimposed onto the sender fingerprint and the receiver fingerprint, the first person using the first configuration to create a first encoding key to encrypt the information thereby forming a first cryptogram, and the second person using the second configuration to create a second encoding key"**. The closest prior art, Tomko et al. (US Patent No. 5,790,668) discloses a method and apparatus for securely handling data in a database of fingerprint biometrics of a subscriber and of the employees of the database used to provide security keys. However, Tomko et al. fail to disclose either singularly or in combination, the fingerprint-derived biometrics of the sender and the

receiver used as encryption keys for the actual information being transmitted between the sender and the receiver. The closest prior art, Buffam (US Patent No. 6,185,316) discloses an apparatus, method, and computer program for providing authenticating indicia and verifying the image thereby, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

5. Therefore, claim 5 and the respective dependent claims 6-11 are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
